DETAILED ACTION

Priority

1. Receipt of acknowledged of papers submitted under 35 U.S.C. 119 (a) – (d), which papers have placed of record in the file.

Oath/Declaration

2. Oath and declaration filed on 7/1/2003 is accepted.

Information Disclosure Statement

3. The prior art documents submitted by applicant in the Information Disclosure Statement filed on July 1, 2003 have all been considered and made of record (note the attached copy of form PTO – 1449).

Allowable Subject Matter

4. Claims 1 – 20 are allowed.
5. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in a combination fails to anticipate or fairly suggest the

Art Unit: 2873

limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claim 1, for example which include a zoom lens formed of only three lens group in order from the object side as follows: a first lens group, a second lens group, a third lens group having (-, +, +) refractive power and the second lens group having a biconvex lens component, a biconcave lens component cemented together and a meniscus lens component with its convex lens surface on its object side and for focusing third lens group move and for zooming third lens group is stationary and first and second lens group are moved and from the wide angle to telephoto end, first and second lens components become closer, second and third lens components become farther and the following condition is satisfied: $f_w / |f_{2-f}| < .2$, where f_w is the focal length of the zoom lens at the wide-angle end and f_{2-f} is the focal length of the image-side lens component of the second lens group.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The closest prior art

Iyama (US 2003/0169509 A1) discloses a zoom lens for use on an image pickup system comprises a first lens group G1 negative power comprising an aspheric negative lens element and a positive lens element, a second lens group G2 comprising a positive single lens element, a positive doublet wherein a positive and a negative lens element are cemented together in this order and which is in a meniscus from convex toward an object side of the zoom lens and a positive single lens element, wherein two or more

Art Unit: 2873

surfaces except the cementing surface of the doublet are each defined by an aspheric surface , and a third lens group G3 comprising one positive lens component.

Watanabe (6, 614,599 B1) discloses the zoom lens system includes a negative power lens group Gi, an aperture stop, a positive power lens group G2 and a positive power lens group G3. For zooming Gi and G2 move on the optical axis with a varying spacing between adjacent lens groups while G3 remains fixed.

Ohashi et al (Us 2004/0004772 A1) discloses a zoom lens comprising a first group of lenses (1) having a negative focal length, a second lens group of lenses (2) having positive focal length, and a third group of lens (3) having the positive focal length in order from an object side, in which the second group of lenses (2) moves monotonically from an image side to the object side and the first group of lens 1 moves so as to correct shift in a position of an image surface.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mohammed Hasan whose telephone number is (571) 272-2331. The examiner can normally be reached on M-TH, 7:00 AM to 5:30 PM.
